

Coming of Age is available in 1 lb. and 7.5 lb. containers

Products below are shown at ~50% scale

Transition Nutes from Veg to Bloom

Coming of Age is a wettable powder (WP) specifically designed to give cannabis the nutrients it needs as it transitions from the vegetative to the flowering stage. Cannabis at this stage requires surprisingly small amounts of phosphate compared with potash, and it's essential that secondary macro-nutrients are available during the development of trichomes.

Directions: After mixing with water, constant agitation is necessary. Apply to soil (not to foliage). Our suggested application rate is one level tablespoon/gallon of water (mixed with warm/hot water first). Apply weekly during the flowering stage. Allow plants one nute-free week before harvest. Mix only what is needed for the immediate application. Flush irrigation systems after each use.

Note: For more info, detailed mixing, and use instructions visit our website below.

Coming of Age is Clean Green Certified.™ This product is compliant with organic production standards as outlined by the National Organic Program (NOP) of the USDA.

Coming of Age - 1 lb.

Coming of Age - 7.5 lbs.

Guaranteed Analysis
